

ANCC

FOR HEALTHCARE PROFESSIONALS AND
ORGANIZATIONS AROUND THE WORLD

ANCC MEANS CONFIDENCE.

ANCCWORLD

Innovate. Involve. **Inspire.**

Nurses lead the front lines of healthcare every day to provide the best care to their patients. ANCC considers it our responsibility to provide credentialing programs that foster excellence in leadership, patient care, and practice environments where healthcare challenges can be met with confidence. High quality is an imperative in today's healthcare environment. Healthcare professionals and the organizations they work for must meet higher standards than ever before, thanks to comprehensive credentialing from the American Nurses Credentialing Center (ANCC).

WITH ANCC CREDENTIALING

Healthcare organizations can trust that nurses are impassioned leaders, with advanced skills to elevate patient care.

Nurses can depend on the organizations they work for to provide safe and healthy work environments and support career advancement.

Governments can be assured that their health providers adhere to current evidence-based practices and standards.

Patients can feel certain they are cared for by an interprofessional team that prioritizes quality and integrity—and cares about being the best.

ANCC, a subsidiary of the American Nurses Association, is the first and only nurse credentialing organization to attain full International Organization for Standardization (ISO) certification—the global standard for quality management. The ISO 9001:2015 certification recognizes the design, development, and delivery of credentialing services and support products for nurses and healthcare organizations around the world.

ACCREDITATION
PROGRAM®

NURSING CONTINUING
PROFESSIONAL
DEVELOPMENT

The ANCC Accreditation Program provides the global credential for organizations that offer high-quality continuing nursing education (CNE), interprofessional continuing education (IPCE), and programs that help develop the knowledge, skills, and abilities to deliver safe, high-quality patient care. ANCC also accredits residency and fellowship programs that transition registered nurses (RNs) and advanced practice registered nurses (APRNs) from academia into clinical practice, between practice environments, and into roles of greater leadership and responsibility.

CERTIFICATION

The ANCC Certification Program is the gold standard for health care professionals in the United States.

ANCC offers its certification exams globally for the convenience of US military or civilian nurses who are living abroad.

FRAMEWORK FOR HEALTHCARE EXCELLENCE

PATHWAY TO EXCELLENCE®

The Pathway to Excellence® Program credentials hospitals, outpatient centers, and long-term care facilities that promote a culture that calls forth best nursing practice and builds a positive, safe and healthy practice environment for interprofessional teams to thrive.

Having a standard dedicated to well-being that requires organizations to proactively assess and continuously safeguard the well-being of their clinicians makes it unique from other organizational credentials.

Nurses can trust that Pathway-designated organizations will give them a voice, value their contributions, support professional development, provide optimal work settings, and foster interprofessional respect and collaboration.

MAGNET RECOGNITION PROGRAM®

The ANCC Magnet Recognition Program® is viewed around the world as the ultimate seal of quality and confidence. Magnet® organizations are recognized for superior nursing processes and quality patient care, which lead to the highest levels of safety, quality, and patient satisfaction. Magnet-designated organizations focus on improvements that result in the best possible outcomes for a healthcare institution, lower error rates, and continuous quality improvement.
